WELCOME TO BILINGUAL HISTORY ...

This book has been compiled to help you integrate History into your classroom.

It is enriched material in English to accompany „**Genial! Geschichte 3**“.

We are sure the children will benefit from using this book, not only to introduce them to some English terminology but also to anchor their knowledge of the subject they are learning in German at the same time.

This book is designed to be flexible. Pages are topic-based and the basic information is highlighted in a square. Activities for the children follow, enabling them to immerse themselves in the subject matter. New vocabulary is provided at the bottom of each page. Furthermore, you can find a complete glossary at the end of the book. The activities can also be used in partner and pair work as well as in open learning.

We also hope that these activities will open up more possibilities of using English in the History lesson. Artefacts can be drawn and labelled, children can compile their own word grid and crosswords for the class or for their friends. Discussions in English on various topics can be arranged in class as the basic information is now available in English. Children can make their own games, using information in the book, such as domino or memory. Even board games are now possible. Posters can be made and displayed.

As English has become such an important language for Austria (inter-cultural learning now knows no bounds thanks to the computer and the Internet) we hope we have been of service in offering you this book.

We wish you lots of fun using it.

FRANCE – THE ABSOLUTE STATE

During the 1600's and the 1700's much of Europe was ruled by kings, queens and emperors. These monarchs were extremely powerful. They were directly responsible¹ for the economic², political and social lives of their countries. Their word was treated³ like that of God – it had to be obeyed⁴. Louis XIV, ruler of France from 1643 to 1715, was the most powerful of these absolute monarchs – he became king when he was five. All decisions⁵ had to be approved⁶ by him – he had absolute power. He is said to have exclaimed: "L' état, c'est moi", which means: "I am the state!" Other European monarchs copied him and became absolute monarchs themselves, having complete control.

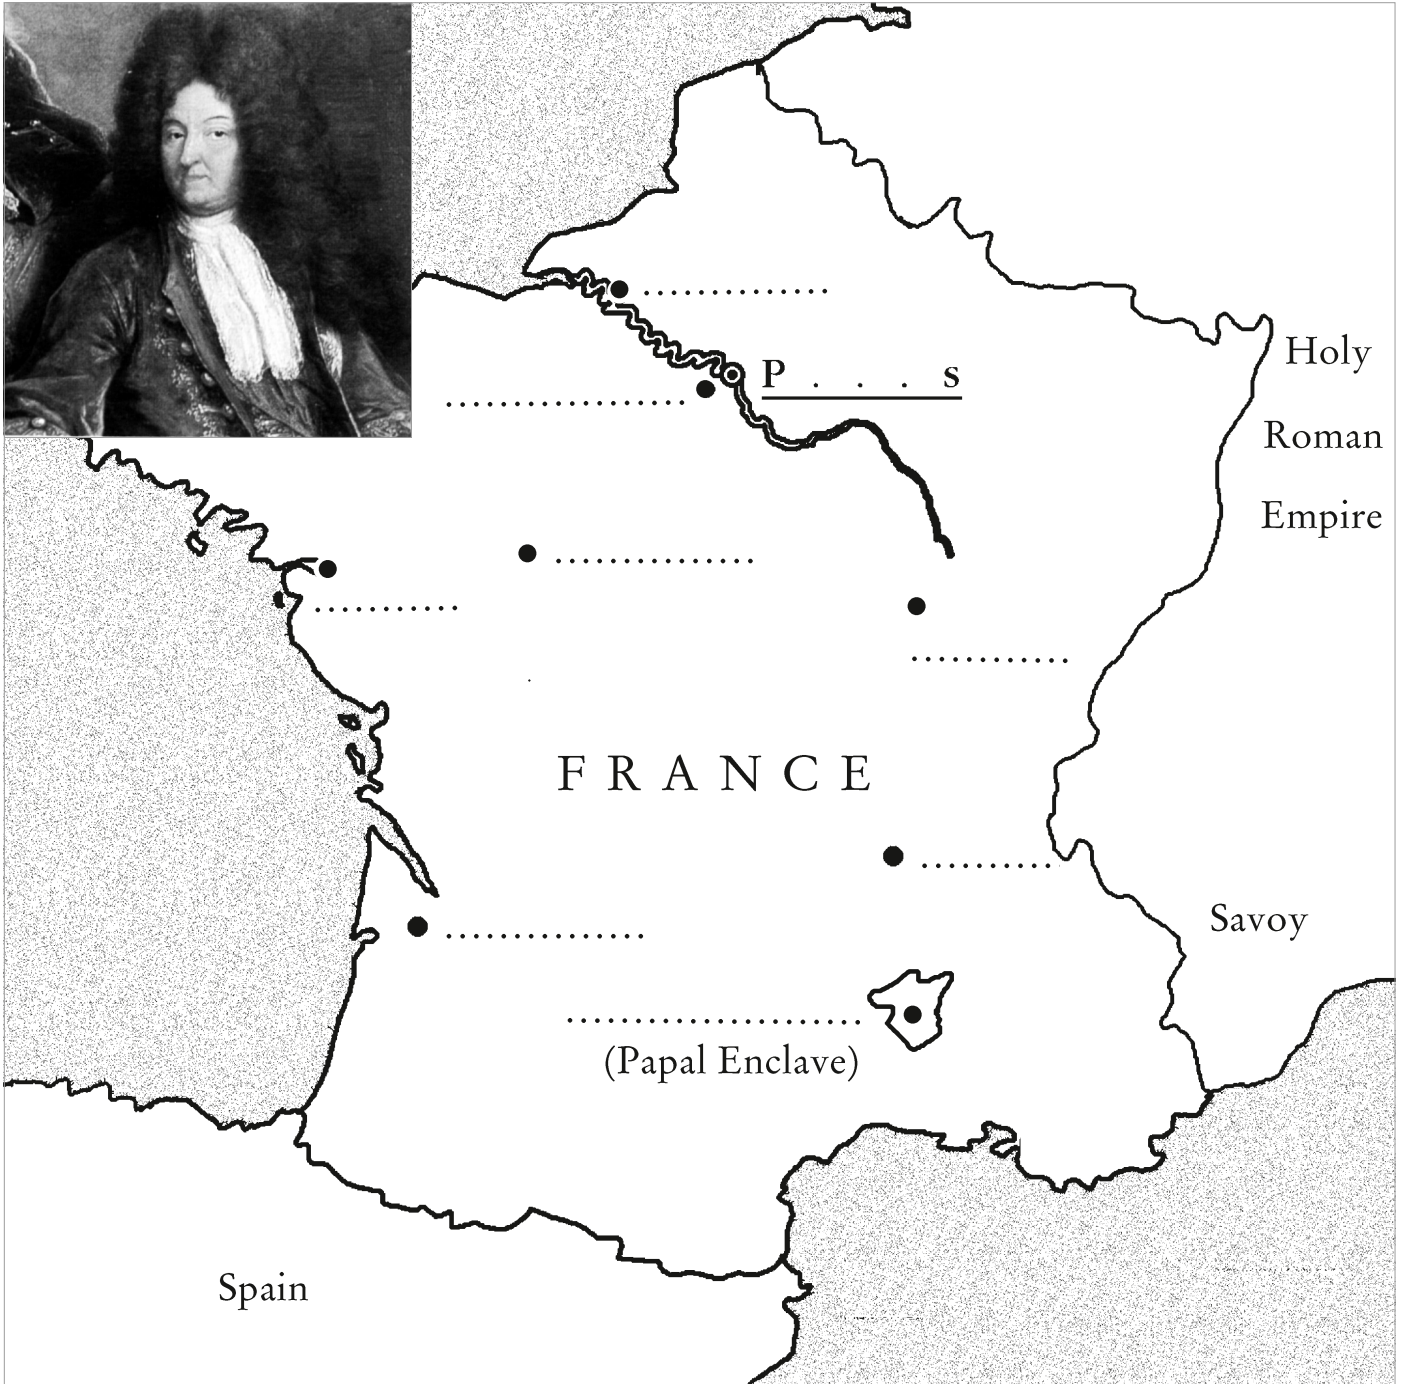

Louis XIV

¹ verantwortlich, ² wirtschaftlich, ³ behandeln, ⁴ gehorchen, befolgen, ⁵ Entscheidung, ⁶ hier: billigen

Under the rule of Louis XIV the French borders¹ were almost the same as today. They were safe from attack from the Hapsburgs, who ruled Spain, Italy and the Holy Roman Empire. Louis XIV ruled from his palace at Versailles, near Paris.

Now put in the following French cities: Avignon (the papal enclave²), Lyons (north of Avignon) and Dijon (north of Lyons). Tours is west of Dijon, and Nantes is west of Tours. Bordeaux is south of Nantes. Versailles is near Paris and Rouen is north-west of the capital.

¹ Grenze, ² päpstliche Enklave (E. = von einem Staat vollständig umschlossenes Staatsgebiet eines anderen Staates)

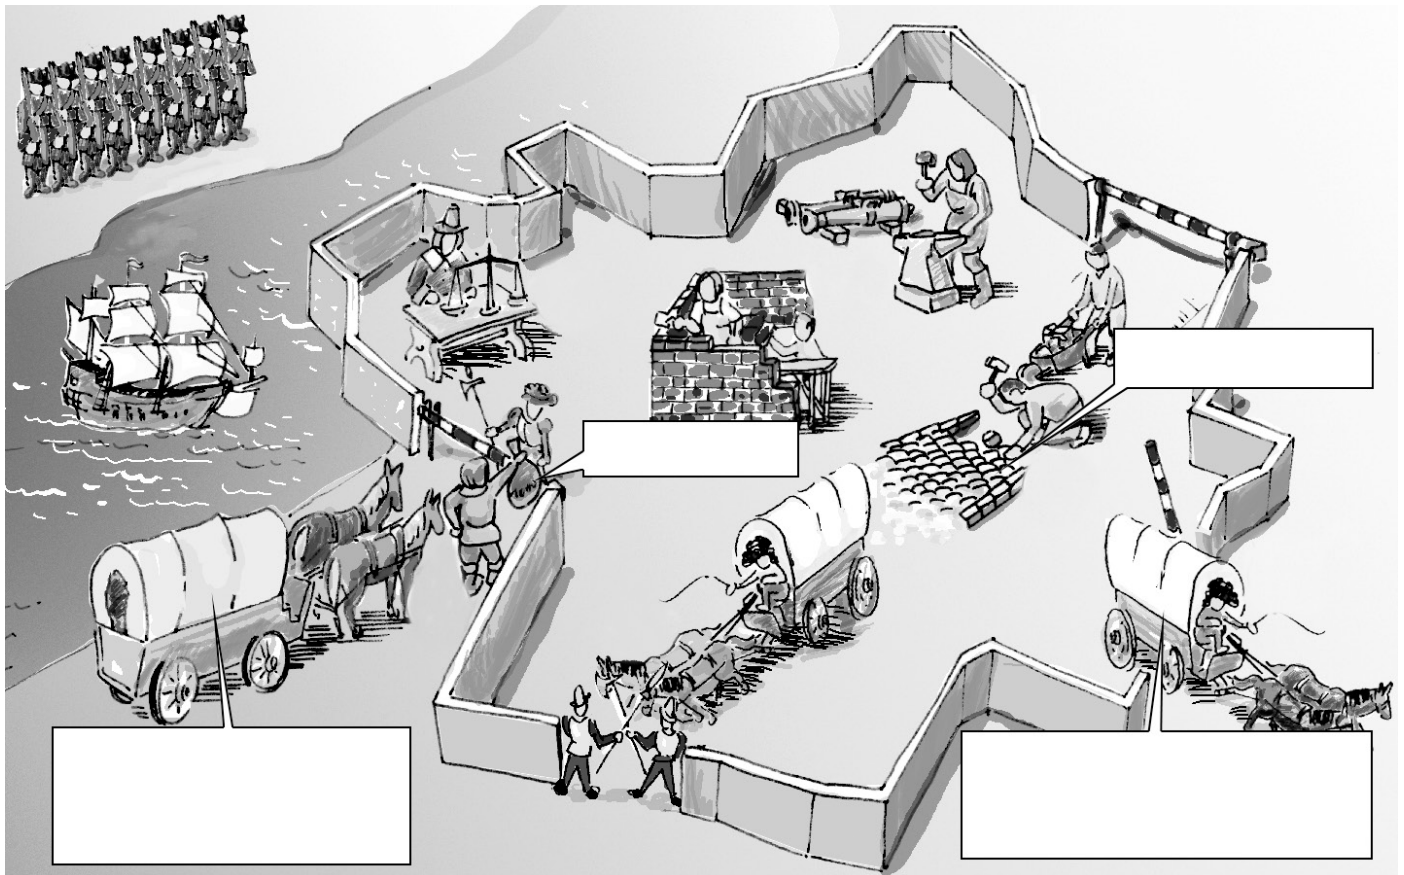

FRANCE – ECONOMY

Louis XIV was certain¹ that his way was right. There were rebellions between 1648 and 1653 by leading nobles² against Louis, but in the end France accepted the strong rule of its king. Louis' lifestyle and his many plans and ideas needed lots of money. He got this money by raising taxes³. He also got money from French colonies in Canada and the West Indies. He had the first great canal built in Europe since Roman times (Canal du midi). This canal links the Mediterranean Sea to the Atlantic. New roads were built and money given to firms⁴. This helped to build up industry and commerce⁵. This money was also used to make the French army the biggest in Europe and to fight wars. Louis' Minister of Finance, Jean-Baptiste Colbert developed a system which was to bring France the highest possible income.

Look at the drawing below, which explains Colbert's financial system, and add the words in the word bank!

Word bank

raw material, roads, finished products, customs duty⁶

¹ sicher sein, ² Adeliger, ³ Steuer, ⁴ Firma, ⁵ Handel, ⁶ Zoll
